## Mile2's Cyber Range – Feel the Power!

- Hackers and cyber trolls have malicious intents:
- Disrupt corporate communications
- Steal trade secrets or intellectual property
- Cause mayhem for political reasons.

Are you prepared to deal with this chaos? The only way to counter respond is to create a simulated scenario where your organization's IT and cybersecurity professionals can train by detecting major threats and securing their company's infrastructure.

Mile2's Cyber Range is High Speed

Cyber ranges function like shooting or kinetic ranges, facilitating training in weapons, operations, or tactics. Thus, cyber warriors and IT professionals employed by various agencies train, develop and test cyber range technologies to ensure consistent operations and readiness for real world deployment.

With mile2®'s proprietary design, **YOU** can **ATTACK** our realistic network by connecting through a simple and safe to use remote connection.

Mile2's Cyber Range is World Class

Mile2®'s up-to-date proprietary labs have been researched and developed by leading information assurance professionals from around the world with one thing in mind - simulate REAL WORLD cyber incidents.
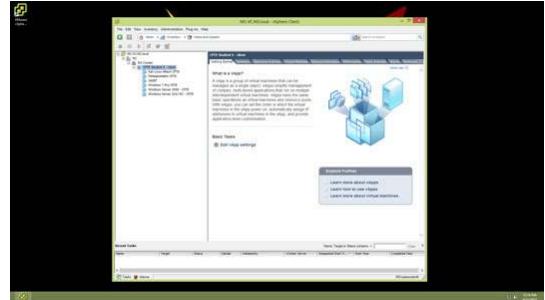

Mile2's Cyber Range:

1. Allows students to access our online labs from anywhere. This allows the student to experience a live simulated environment.
2. Provides in depth cyber security exercises that can gauge your cyber skills that emulate life cyber security events.
3. Simulate and counter respond multiple threats in pen testing, ethical hacking, incident handling, forensics, web application, virtualization, and cloud computing.
4. The Cyber Range gives you the ability to use some of the best, most effective tools in the industry, including SAINT as well as other open source tools.
5. Experience mile2's official Red vs. Blue Team certification scenario-based simulation.

Mile2 Offers an Array of Cyber Range Options

Accomplish all of the labs and explore advanced hacks by following Mile2®'s step-by-step lab practicals. Mile2® offers the range for the following courses:

1. Certified Penetration Testing Engineer
2. Certified Penetration Testing Consultant
